Retrieving Data From A Database: retrieving.php

```php
<?php

    $link = mysqli_connect("localhost", "cl20-exampledb", "K7.7grb-Y", "cl20-exampledb");

    if (mysqli_connect_error()) {

        die("Could not connect to database");

    }

    $query = "SELECT * FROM users";

    if ($result=mysqli_query($link, $query)) {

        $row = mysqli_fetch_array($result);

        print_r($row);
```

```php
    } else {

        echo "It failed";

    }

?>
```
